

An online platform for exercises, assessments and exams

The Edumatic platform provides an **advanced web-based authoring tool** to create, structure, manage and deliver online assessments.

With **direct online assessment publishing** or a **Single-Sign-On** to an **e-learning platform**, candidates can take an assessment within school premises, at home, or in a **secure and controlled** environment or exam centre.

After the assessment is finished, the **results** can be consulted through **comprehensive online reporting**.

Fully online - nothing to install

Edumatic is a fully secure online system and works directly through any internet browser without the need to install any application files. Assessment authoring, management and delivery can be administered from any PC with an internet connection.

- ✓ Secure web based examination & reporting system
- ✓ Diagnostic, formative and summative assessments
- ✓ Employee assessment & training tool
- ✓ Certification, compliance, competency evaluations

Works with all internet browsers

Link with Virtual Learning Environments (VLE)

Edumatic can work as a standalone system or can be linked to internal administrative and user-management systems, VLE's and other online platforms through Single-Sign-On.

An easy-to-use software interface allows complex actions for creating and publishing assessments.

 Workspace	————>	Question creation and item banking
 Scenarios	————>	Create scenarios before publishing
 Assessments	————>	Validate and publish assessments
 Management	————>	User/candidate management
 Metadata	————>	Metadata properties for items
 Reporting	————>	Tracking and logging of assessments
 Media Library	————>	Storage area for images, audio/video, files...
 Schedules	————>	Create schedules for assessments & users

Edumatic allows authors to create question items, organise them in clearly structured folder, and add metadata for easy retrieval.

Authors can quickly create and preview question items within their internet browser
